

JOB ADVERT

Senior Technical Manager

Competitive Salary

Holyhead, Anglesey

Stopford are undertaking recruitment for our client Orthios, who have an exciting opportunity for a Senior Technical Manager to join the team, at their Eco Park located in Holyhead, Anglesey (North Wales).

The Company

Orthios is a regenerative development specialist, with a wide expertise in plastic waste processing, energy, logistic, aquaculture, hydroponics, architecture, and project delivery. Their main objective is delivering local solutions for global climate change challenges by recycling and converting non-recyclable material into clean, green energy.

You will be based at their Operational Site Office in Holyhead, Anglesey. The Orthios Eco Park comprises a suite of innovative technologies to generate products for use in both the domestic and industrial markets. Orthios's major projects include the (P20) pyrolysis depolymerisation of plastics for the production of synthetic blending oils, mechanical separation of SRF into high grade feedstocks and electrical generation for distribution via the National Grid using excess non-condensing pyrolysis gases in reciprocating engines.

Plastics-2-Oil is an innovative safe, cost effective and clean technology to decompose polymers to obtain a re-usable mix of oils, chemicals gas and heat and it is a key project in Orthios team's determination to become fully carbon neutral operation by 2030.

This is a fantastic opportunity to join a revolutionary company as the Senior Technical Manager and work with highly skilled professionals who are constantly striving to deliver excellence and best practice.

The Benefits

- Competitive Salary,
- Pension,
- 25 days holiday plus bank holidays,
- Generous Sick Leave program,
- Employee assistance program,
- On-site parking,
- Membership Fees.

The Role

Reporting to the Chief Operating Officer, the Senior Technical Manager will have overall responsibility for the technical elements of the P2O plants and will have the following qualifications. You will have a team of operating, maintenance and engineering staff, supporting you in the day-to-day management and operation of a state-of-the-art large scale waste plastic to oil facility. The successful candidate will need to ensure that the plant runs efficiently and meets compliance with relevant standards.

Key Responsibilities

- Providing overall technical direction and control for PDU operations.
- Role of Senior Authorized Person for the Mechanical, Chemical and Process elements of the business.
- Overall responsibility for the safe and efficient operation of the Plastic-to-Oil process plant.
- Providing direction and support to the Operations Manager and indirectly to the Plant Operations Team so that all project work is carried out efficiently, effectively, to a high technical standard, in line with the agreed project plan and profitability target and to the satisfaction of the client.
- To proactively develop the level of expertise within the team so that the team is technically and managerially superior to the competition and perceived as such by clients and other influential third parties.
- To maintain a clear overview of the overall resources required to conduct projects to the high standard required.
- All work is carried out to the highest possible technical standard and in accordance with the agreed project plan, costs and timescales.
- Provide direction to the greater team for training, regulatory and compliance development so that they progressively gain the necessary knowledge and skills required not only to improve short term performance but also to prepare them for future roles which are required by the company and satisfy their long-term career aspirations.
- A culture of continuous improvement, continuous learning and self-development is proactively led and encouraged.

About you

The Senior Technical Manager will have overall Technical responsibility for the P2O plants and will have the following qualifications and a minimum of 10 years' experience.

- Degree Qualified in engineering or applied chemistry,
- Experience running a petrochemical plant or similar at management level,
- Qualified in lean manufacturing or process optimisation, e.g., black belt in Six Sigma,
- Good report writing and presentation skills,
- Management of blue collar and technical personnel,
- Good understanding of safety requirements.

Please note we do not accept applications from agencies, and you must be eligible to live and work in the UK.

To apply, please email your CV to orthios.recruitment@stopford.co.uk and quote job reference TM2021.

If we think you have got potential, we will be in touch within 10 working days.
